

Suggestions for a Greener Florida Pagan Gathering

Take responsibility to bring your own plastic or metal cup and keep it with you at all times to use for coffee, water, or beverages of the adult variety. Write your name on it for identification. It makes a tremendous positive impact and will support our spiritual paths of personal responsibility.

Each person carries out their own recyclable trash. Make a positive impact on the festival. There is a name for it: LNT= Leave No Trace.

Use a napkin instead of a plate for sandwiches. Better yet, use your own durable ceramic (ok, plastic, we are camping) at each meal.

Purchase earth friendly products for washing up yourself and your dishes.

Make a fire that can be seen from earth, not outer space.

Switch to food that does not require a plate: sandwiches.

Set up designated recycle box next to trash can at your campsite. Pack out what you brought in.

Minimum glass rule. Bring as little glass as possible.

A 20-Gallon tank with water (think yellow igloo cooler) Works great! Keep water bottles and fill those up for convenience.

THINK before you ever leave home. Do I you REALLY need to bring this?
